

# How to Connect to a Court Hearing for Audio and Video Using a Smartphone

1. If you are using a smartphone, please download the “Cisco Webex Meetings” app from app store. It is free. There is no reason to set up an account.
2. Click on “**Join Meeting**” and enter the Meeting number and password found on the top portion of the Notice of Hearing located in the “PLACE OF HEARING” box.
3. Before selecting the option to “**Join**” please decide how you will like to attend the audio portion of the meeting. Your smartphone will have two options, “**Use internet for audio**” or “**Call in**”.

Either option is fine but we have found that the audio quality is best by selecting the “**Call in**” option.

If you select “**Use internet for audio**” then you will be connected via the internet for the audio connection.

If you select “**Call in**”, your smartphone should automatically dial the number and the access code for you.

4. Select “**Join**”.

Note: If you hear back noise during the conference meeting please consider muting your phone if possible.
